REPLY TO THE ATTENTION OF:

MEMORANDUM

SUBJECT: Selmer Company

FROM: Charles Mckinley *cmk*

TO: Ken Theisen

Rick Field called me on October 4 to discuss the process by which the survey of homes and businesses in the Selmer neighborhood ought to be conducted. He asked that we provide Selmer with a list of the streets and the boundaries which should be included in such a survey. Also, he requested that we set forth some sort of priority as to the areas to be surveyed first. Can you get that information together for me to transmit to him?

Also, he suggested that once this information was in hand, Selmer walk each of the specific streets making note of each individual address. With that information, it would then review the city's records to determine which addressees were hooked up to city water and which weren't. Upon identifying those which do not appear to be connected, he requested that the individual residence be contacted directly by a public official rather than by a representative of Selmer. Do you have any comments on this proposed methodology?

He advised, further, that Selmer is willing to have the obligation to conduct the aforementioned investigation be a part of the consent order. I apologized for the delay in getting back to him concerning the proposed consent order. Though he is not particularly concerned about the time, if you and Nola would look at the proposed order and be prepared to discuss it with me on the morning of October 13, I will try to put together the Agency's revisions.

cc: Nola Hicks
